Damelin
2020

SACAA Cabin Crew License
Future Flyers Training Academy
2016

SKILLS

Communication
Teamwork
Project Management
Time Management
Leadership

PROGRAMMING

C# with ASP.NET
SQL in Oracle
Python
Java

UNIVERSITY PROJECTS I HAVE WORKED ON

- Medical Centre Appointment App: C#, ASP.NET, MS SQL Server
Developed a dual-interface appointment management system for a medical center. Clients could book, view, and manage appointments via the web portal, while receptionists used a Windows Forms application to receive real-time updates. The system ensured seamless synchronization between client-side and practice-side scheduling.

- Flight Crew Logbook: ASP.NET, C#, SQL
Created a digital logbook platform for flight attendants, enabling crew members to log flight details, track flight hours, and maintain personal records online. The application provided a user-friendly interface and secure data management through SQL integration.

- Medical Practice Database Project: Oracle SQL
Designed and managed a medical appointments database using Oracle SQL. Focused on data manipulation through SQL queries, including appointment scheduling, data updates, and reporting operations to simulate real-world healthcare data management scenarios.

PROFESSIONAL EXPERIENCE

- In-Charge Route Check Flight Attendant
Safair Operations t/a FlySafair, Cape Town | June 2017 - Present

- Promoted to In-Charge Flight Attendant in February 2019 and promoted to Route Checker in February 2024.
- Overall responsibility for conduct and coordination of normal and emergency cabin procedures.
- Conduct in-flight proficiency checks on company employed flight attendants.

- IT Assistant
Hottentots-Holland High School, Somerset West | February 2017 – June 2017

- Assisted with day-to-day workstation issues.
- Escalated serious issues to service provider.
- Built PCs and added the workstations to the network
